# EPI | DESIGN YOUR LIFE

We work continuously to develop new products using innovative materials and techniques and combine them with style. Creating functional and sustainable design is our strength. EPI Gusto and Rocca floors are our latest innovations. They combine the classic terrazzo look with the qualities of a cast floor; strong, comfortable and stylish.

## **EPI colour collection**

For an authentic terrazzo look we carefully developed the gorgeous EPI Gusto and Rocca Colour Collection. EPI Gusto and Rocca floors are available in twelve design colours, with fine granules mixed in. Gusto is a single colour floor, Rocca is a blend floor that combines two shades.

## **De EPI Gusto and Rocca floors are:**

- Seamless and liquid-tight
- Easy to clean and maintain
- Remains elastic so less prone to cracking
- Available in 12 beautiful colours

## **Suitable for:**

- Residential
- Schools
- Corporate offices and cafeterias
- Hotels, lobbies and atriums
- Museums & Art galleries

### Sustainable & Strong

The EPI Gusto and Rocca floors are both strong, wear resistant and UV-stable, eliminating colour changes. The mix of ingredients ensures the floor is more resistant to point loads and will last a lifetime. The floor is made of 70-80% natural ingredients.

### Comfortable

The floor has a luxurious feel and is sound reducing. Because of the terrazzo look dirt doesn't show as much. The floor takes on the temperature of its surroundings, especially in combination with floor heating this makes for a very comfy feeling.

### Low maintenance

The EPI Gusto and Rocca floors are easy to keep clean, seamless and low maintenance. Perfect in combination with floor heating or over existing floors

## EPI | ABOUT US

EPI is a family business and for over 30 years it has been producing and supplying first-class products to flooring companies worldwide. Sustainable operating is engrained in our corporate identity. Our goal is to see future generations grow up healthy and happy. This is why our products consist mainly of unprocessed natural raw materials such as biopolymers and natural fillers.

That is our commitment to create a better environment.

### Strong and wear-resistant

It is not often that comfort and strength are combined. However our R&D team successfully developed a floor that is comfortable, as well as strong and durable. The floor can handle different types of loads and is UV resistant, which means sun- and daylight have no effect on the colour of the floor. An Epi Rocca or Gusto floor has an average lifespan of 40 years, this floor will last a lifetime!

### Stylish look

EPI Gusto and Rocca floors have the authentic look of a Terrazzo floor. Whether you prefer a classic, or modern style, this versatile floor can do it all. The mix of colours and various materials ensures a unique floor that compliments your interior and meets your specific requirements.

The EPI Gusto floor has a single colour as a base to which fine granules are added for the Terrazzo look. The EPI Rocca floor has a blend, mix of two colours, as a base to which fine granules are added.

### Gespecialiseerde applicateurs

At EPI we produce floors, we do not install them. We trust our worldwide network of specialist flooring companies with the installation of our flooring systems. Our partners all have in common that they love their craft and have a great eye for detail. We will connect you with our carefully selected installers.
