EPI Sports & Rubber Surfaces B.V. manufactures in compliance with the NEN-ISO 9001 / 14001 Quality and Environmental management systems. This means that product deliveries are being done according to the product- and quality specifications of these management systems. Our technical advice - whether verbal, in writing or by way of trials - is given in good faith but without warranty, and this also applies where proprietary rights of third parties are involved. It does not release the applicator/ installer from the obligation to test the products supplied by us as to their suitability for the intended processes and uses. The application, use and processing of the products are beyond our control and therefore, entirely the responsibility of the applicator/ installer. Should in spite of this, liability be established for any damage, it will be limited to the quality of the delivered products used by the applicator/installer. We will of course provide products of consistent quality within the scope of our General Conditions of Sales and Delivery. Before use, all relevant product safety sheets, technical data sheets and application guidelines should be consulted. Copies of all the above documents are available on request. EPI-Synthetic Surface Materials B.V. reserves the right to change product specifications and product characteristics.
